

Office Evolution partners with eco-friendly ISONAS to improve client security and access technology

IP-at-the-door reader-controllers allow clients seamless 24/7 access

Denver, CO (PRWeb) 29 July 2009 – [Office Evolution](#) announces the completion of its card reader access system which allows all of its clients seamless access to all nine locations 24/7. This system provides unmatched flexibility for all of its clients; with a single fob they can now use any location at any time without having to carry multiple access cards or keys. Office Evolution clients now have nine full time offices at their fingertips for no additional cost. The system also streamlines Office Evolution's management and security since the company only has a single database to manage.

Office Evolution is a progressive Virtual Office, Live Answer and Executive Suite company based in Boulder, Colorado offering a full range of business services including:

- [Nine Denver metro Locations](#)
- [Executive Office Suites](#)
- [Virtual Office Services](#)
- [Day Office Space](#)
- [Live Answer Telephone Receptionists](#)
- [Conference Room Space](#)

Office Evolution has business centers in [Denver](#), [Boulder](#), [Longmont](#), [Highlands Ranch/Lone Tree](#), [Lakewood/Golden](#), [Centennial/Aurora](#), [Louisville](#), and [Littleton](#). In each location clients can use conference rooms, board rooms, training rooms and office space.

The new system was provided by [ISONAS](#), a security systems company based in Boulder, Colorado. The Isonas system is IP based with a central database allowing for simple control over many locations. Isonas makes every effort to keep its products ecofriendly. By using green materials in both products and packaging, and by adhering to a 'No Paper Waste' philosophy, ISONAS minimizes its eco footprint. Office Evolution is pleased and proud to support a local company encompassing these eco-friendly values.

In addition to affording all Office Evolution clients convenient, 24/7 access to nine office locations across the Colorado Front Range, the partnership between ISONAS and Office Evolution improves security for clients, employees and company property. IP-at-the-door reader-controllers provide real-time information about who is in each location at any given time.

Office Evolution provides the tools necessary to help small businesses succeed by enabling them to project a more professional image while increasing productivity and improving customer service. Sole proprietors, entrepreneurs, consultants, and growing businesses comprise the core clientele of Office Evolution.
